

# Oil Field Environmental Incident Summary

**Incident:** 20140609171543

**Date/Time of Notice:** 06/09/2014 17:15

**Responsible Party:** BURLINGTON RESOURCES OIL & GAS COMPANY LP

**Well Operator:** BURLINGTON RESOURCES OIL & GAS COMPANY LP

**Well Name:** PARRISH 1-31H

**Field Name:** PERSHING

**Well File #:** 17371

**Date Incident:** 6/9/2014

**Time Incident:** 10:40

**Facility ID Number:**

**County:** MCKENZIE

**Twp:** 150

**Rng:** 96

**Sec:** 31

**Qtr:** NE SE

**Location Description:** Immediately adjacent to the Northe east side of the well pad.

**Submitted By:** Lewis Schoenberger

**Received By:**

**Contact Person:** Lewis Schoenberger  
PO BOX 51810  
MIDLAND, TX 79710-1810

**General Land Use:** Pasture

**Affected Medium:** Topsoil

**Distance Nearest Occupied Building:** 0.5 Mile

**Distance Nearest Water Well:** 0.5 Mile

**Type of Incident:** Other

**Release Contained in Dike:** No

**Reported to NRC:** No

	Spilled	Units
Oil	10	Gallons

Recovered	Units
-----------	-------

Followup	Units
----------	-------

Brine

Other

**Description of Other Released Contaminant:**

**Inspected:**

**Written Report Received:** 8/18/2016

**Clean Up Concluded:** 6/30/2014

**Risk Evaluation:**

None

**Areal Extent:**

**Potential Environmental Impacts:**

Oil mist deposited on plants off of the Northeast side of the well pad.

**Action Taken or Planned:**

Oil impacted soil and debris on the pad will be collected for appropriate disposal. Oil impacted vegetation will be cut and collected for appropriate disposal.

**Wastes Disposal Location:** to be determined

**Agencies Involved:****Updates**

---

**Date:** 6/25/2014    **Status:** Reviewed - Follow-up Required

**Author:** Roberts, Kris

**Updated Oil Volume:**

**Updated Salt Water Volume:**

**Updated Other Volume:**

**Updated Other Contaminant**

**Notes:**

Release, due to an unspecified cause, sprayed on and off location. Followup is necessary to confirm adequate cleanup off location.

**Updated Other Contaminant**

**Notes:**

On site 10:15 - off site 11:30. Overcast, no wind, 67 degrees. Incident appears to be overflow from tank battery. No puddles, but the soil is oily (took pictures). Nearly all of the oily material is on top (flat surface) of the well pad. What small volume that did get off pad did not appear to get beyond a short distance of the outside slope of the pad. Walked all the way around west and north side of pad and looked for signs beyond the pad base and could not find any. The nearest water is a natural seep and resulting drainage that has tributaries on both the north and west sides of the pad 150 feet and 300 feet away, respectively. Vegetation looked healthy, and there were lots of bugs swimming around. The drainage off the area of the pad (where the spill is) is in two locations: to the north 50 feet west of the NW corner of the pad, and to the west 30 feet south of the NW corner. There was a workover crew on site, and I talked with them about cleaning up the top to remove any risk of the remaining oil-impacted soil off site. They do not own the pad but would pass along the information.
